

How to Manually Update the Software of your NTB or CMS

1. On your NTB or CMS, navigate to **Help > About** and check the existing software version.
2. Go to the product updates page at <https://onelan.com/support-training/product-updates/> and select the appropriate product.
3. Find your software version in the list and download the corresponding update.
4. To do a manual update, on your system, navigate to **Setup > Maintenance & Troubleshooting > Software Update**.
5. Click on the **Manual Update** tab.

6. Click **Choose File**.
7. Find the update file you downloaded earlier.
8. Click **Upload**.
9. Once the file has uploaded, you will need to click the **Reboot** hyperlink.

10. Confirm the reboot by selecting **Yes** and clicking **Reboot**.

11. The player will reboot and update the player.
